Notice of Abandonment

Part of Paper No. 20110324

PROPOSED NEW PROGRAM: "TRACK ONE" ACCELERATED PATENT EXAMINATION:

On February 4, 2011, the USPTO published in the Federal Register a notice of proposed rulemaking, titled "Changes to Implement the Prioritized Examination Track (Track I) of the Enhanced Examination Timing Control Procedures." The "Three-Track" program is designed to enable applicants to choose the speed with which their patent application is processed. Track I will give applicants the opportunity for prioritized examination of a patent application within 12 months of its filing date for a fee. The Federal Register notice requests comments from the public on a number of different proposed requirements for participation in Track I, including (a) a prioritized examination fee, which is in addition to the current filing fees, the publication fee, and a processing fee; (b) limits on the number of claims to four independent claims and 30 total claims; (c) application filing through the USPTO's electronic filing system (EFS-Web); and other such requirements. The comment period closed 30 days after February 4, 2011. For complete information see the notice at 76 Fed. Reg. 6371.

In preparation for this initiative, look for further announcements including a final notice.

Other available programs which allow prioritized examination include:

PATENT PROSECUTION HIGHWAY PILOT PROGRAM: An applicant receiving a ruling from the Office of First Filing (OFF) that at least one claim in an application filed in the OFF is patentable may request that the Office of Second Filing (OSF) fast track the examination of corresponding claims in a corresponding application in the OSF. For further information, see http://www.uspto.gov/patents/init_events/pph/index.jsp and the Federal Register notice of May 25, 2010, (75 Fed. Reg. 29312).

GREEN TECHNOLOGY PILOT PROGRAM: An application pertaining to green technologies including greenhouse gas reduction (applications pertaining to environmental quality, energy conservation, development of renewable energy resources or greenhouse gas emission reduction) may be advanced out of turn for examination. The USPTO has expanded the eligibility for the pilot program to include applications irrespective of filing date and classification, and extended the program until December 31, 2011. For complete information see http://www.uspto.gov/patents/init_events/green_tech.jsp

PROJECT EXCHANGE: An application will be advanced out of turn for examination if the applicant files a petition to make special with the appropriate showing. Special status for examination is accorded if the applicant is able to satisfy (i) the requirements set forth in [the June 24, 2010 Federal Register notice](#) titled "Expansion and Extension of the Patent Application Backlog Reduction Stimulus Plan" and (ii) the conditions set forth in [the November 27, 2009 Federal Register notice](#) titled "Patent Application Backlog Reduction Stimulus Plan," other than the small entity requirement, which was eliminated. This procedure allows applicants having multiple applications currently pending before the USPTO to have greater control over the priority with which their applications are examined. The program has been extended to December 31, 2011. For full details visit http://www.uspto.gov/patents/init_events/PatentStimulusPlan.jsp#heading-1

ACCELERATED EXAMINATION: The USPTO will prioritize an application for examination if the applicant files a grantable petition to make special under the accelerated examination program. Under this program applicant can expect examination before the examiner to be disposed of within 12 months of filing of the application. Requirements include a complete application upon filing and a petition filed on the same day. The petition must include, *inter alia*, documentation of a prior art search and a discussion of the most relevant references and the patentability of the claims over those references. For complete details see [MPEP § 708.02\(a\)](#) and <http://www.uspto.gov/patents/process/file/accelerated/index.jsp>

PEER REVIEW PILOT PROGRAM FY 2011: A notice titled ["A New Pilot Program Concerning Public Submission of Peer Reviewed Prior Art"](#) published in the *Official Gazette* on December 28, 2010. The notice provides details about the viability of using Internet technologies and the power of crowdsourcing to uncover potentially useful prior art for consideration by patent examiners during the examination process. For more information on the pilot and how to participate, visit http://www.uspto.gov/patents/init_events/peerpriorartpilotindex.jsp
